The control group was divided into two subgroups: the control group and the experimental group. The experimental group was divided into two subgroups: the control group and the experimental group. The control group was divided into two subgroups: the control group and the experimental group. The experimental group was divided into two subgroups: the control group and the experimental group.

Figure 1 is a schematic representation of the experimental design. It shows a sequence of three boxes connected by arrows. The first box is labeled 'Stimulus' and contains the word 'MILK'. The second box is labeled 'Response' and contains the word 'MILK'. The third box is labeled 'Feedback' and contains the word 'MILK'. The arrows indicate the flow from Stimulus to Response to Feedback.
